A day in the life of a Logistics Administrator

May 31, 2024

We asked Sumaya, one of our Logistics Administrators, to give us an insight into what she spends her day doing. 8:30AM-9:00AM: I arrive at the office bright and early. I like to kick off my day with a

cup of coffee and have a nice catch-up with my colleagues, while

Tools we use to support you (2024 edition)

May 23, 2024

From monitoring to end user remote support, we have a myriad of tools that we use on a daily basis to provide the best possible support to our clients across the globe. While our clients may never see some of these tools, they are critical in keeping their systems running

Your guide to on-premise vs cloud (2024 edition)

May 17, 2024

We've certainly now passed the initial novelty of the cloud. At Chalkline, our team have been doing cloud migrations for well over 10 years. Most companies we speak to now have their email in the cloud, typically using Microsoft 365 or Google Workspace. We do see a lot of organisations

Demystifying WiFi Technologies

May 10, 2024

In today's interconnected world, WiFi technology has become an indispensable part of our daily lives, enabling us to stay connected, productive, and entertained wherever we go. However, understanding the intricacies of WiFi can be daunting, especially with the constant evolution of wireless networking standards and technologies. What is WiFi? WiFi,

Outsourcing IT Support – Co-Managed vs Fully Managed

May 3, 2024

Outsourcing IT support has become a popular choice for businesses looking to streamline operations, reduce costs, and access specialised expertise. Whether you're a small start-up or a larger enterprise, outsourcing IT support can offer several benefits: Cost Savings: Outsourcing IT support can be more cost-effective than maintaining an in-house IT

We are a Living Wage Employer: A Commitment to Fair Compensation

Apr 26, 2024

In January 2022, we proudly achieved accreditation with the Living Wage Foundation. This significant milestone reflects our commitment to fair compensation and social responsibility. As the Operations Manager, I have witnessed first-hand the positive impact of our Living Wage accreditation on employee morale. What Is the Living Wage? The Living

Enhancing Cybersecurity with Managed Detection and Response (MDR)

Apr 20, 2024

As cybercriminals employ increasingly sophisticated social engineering tactics, businesses must bolster their defences to protect against the rising threat of data losses and security breaches. The challenge is not only to detect these threats but to respond effectively before any damage can occur. The Challenge: Sophisticated and Evolving Cyber Threats

Local admin regular password rotation – better to be safe than sorry!

Apr 20, 2024

Local administrator accounts on Windows systems hold critical privileges, controlling files, directories, and services on local devices. These accounts are akin to a master key for your company's data. Important questions to consider include: How often are these passwords changed? Do the same passwords get used across all devices? Could

Application Control and Ringfencing™

Apr 20, 2024

In our previous discussion on the importance of cybersecurity in remote working environments, we highlighted that 61% of organisations have yet to establish a Bring-Your-Own-Device (BYOD) security policy, even as devices such as tablets, smartphones, and personal laptops become common tools for professional tasks. The Challenge of Unsecured Applications When

Enhance your Cybersecurity with Application Allowlisting
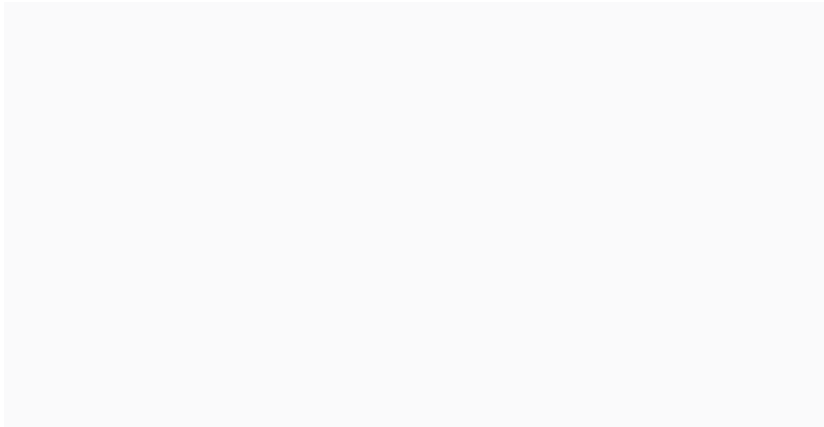

Apr 20, 2024

In today's digital age, cybersecurity is a paramount concern for businesses across all industries. One of the most effective ways to bolster your organization's defences against cyber threats is

through application allowlisting (also known as application whitelisting). With the help of our partner, ThreatLocker, we can significantly enhance your cybersecurity
